IT SUPPORT SPECIALIST | HELP DESK | TECHNICAL SUPPORT

PROFESSIONAL SUMMARY

IT Support Specialist with experience providing Tier 1 technical support, troubleshooting hardware and software issues, supporting enterprise applications, resolving account-access and authentication problems, documenting incidents, and assisting end users remotely. Hands-on experience with Windows, Active Directory, Microsoft 365, networking, ticketing systems, and technical troubleshooting. Additional experience in camera operations and dispatch within a large stadium environment, including surveillance monitoring, incident communication, documentation, and operational coordination. Proven customer-service background with strong communication, problem-solving, situational awareness, and de-escalation skills. Currently completing a Bachelor's degree in Cybersecurity & Information Assurance with three classes remaining.

IT Help Desk | Tier 1 Technical Support | Service Desk Support | Hardware & Software Troubleshooting | Windows 10/11 | Active Directory | Microsoft 365 | Password Resets | Account Support | Application Support | Remote Support | Ticketing Systems | Incident Documentation | Network Troubleshooting | TCP/IP | DNS | DHCP | Customer Service | Technical Documentation | Incident Resolution | Dispatch Operations | Surveillance Monitoring | Incident Communication

PROFESSIONAL EXPERIENCE

ALLIED UNIVERSAL — RAYMOND JAMES STADIUM

Camera Operations / Dispatch | Tampa, Florida | September 28, 2026–Present

- Monitor camera systems and operational activity throughout the stadium environment.
- Support dispatch operations by receiving, communicating, and coordinating information regarding incidents and operational activity.
- Communicate with security and operations personnel to relay information and coordinate appropriate responses.
- Monitor situations through surveillance systems and provide timely information to appropriate personnel.
- Document incidents, activity, and relevant operational information accurately.
- Follow established procedures for incident response, communication, escalation, and documentation.
- Maintain situational awareness in a high-volume, fast-paced environment while managing multiple communications and priorities.
- Work collaboratively with security, operations, and other personnel to support safe and efficient stadium operations.

ARISE VIRTUAL SOLUTIONS — CIT BANK

IT Support Specialist | Independent Contractor | Remote | March 2026–Present

- Provide Tier 1 technical support to enterprise users through phone and remote support tools.
- Troubleshoot hardware, software, enterprise applications, account-access, authentication, and password-related issues.
- Assist users with Microsoft applications, software navigation, account support, and technical problems.
- Use structured troubleshooting techniques to identify technical issues and determine appropriate resolutions.
- Document incidents, troubleshooting steps, resolutions, and escalations through ticketing systems.
- Troubleshoot connectivity and network-related issues and determine appropriate escalation paths.
- Escalate complex technical issues to appropriate support teams while maintaining communication with end users.
- Follow established procedures for account support, incident resolution, and technical documentation.

EDUCATION

Western Governors University

Bachelor's Degree, Cybersecurity & Information Assurance — In Progress | Three classes remaining

TECHNICAL PROJECTS

RFID TIME TRACKER

- Built a full-stack RFID work-session tracking system using Arduino, RC522 RFID, Python, SQLite, and FastAPI.
- Integrated hardware, programming, database, and web API components into a functional tracking application.

LINUX LOG ANALYSIS PIPELINE

- Created an automated Bash pipeline to collect Linux system information, analyze logs, and generate structured security reports.
- Used Kali Linux, Bash, Python, SQL, and Linux command-line tools to develop a repeatable analysis workflow.
- Demonstrated Linux administration, scripting, log analysis, automation, and technical documentation.
