SUMMARY

IT Support Specialist with Tier I and Tier II technical support experience in remote and customer-facing environments. Skilled in troubleshooting hardware, software, connectivity, account access, and device issues while delivering professional customer service. Experienced with active listening, problem resolution, ticket documentation, remote support, and explaining technical solutions clearly to end users. Strong technical foundation in Windows, networking, Microsoft 365, Active Directory, and cybersecurity.

EDUCATION

Western Governors University

Bachelor of Science, Cybersecurity & Information Assurance

EXPERIENCE

IT Support / Customer Service Representative

April 2024 – Present

Great Clips

Tampa, FL

- Provide Tier I and Tier II technical support for hardware, software, account access, and user issues in a customer-facing environment.
- Troubleshoot technical issues by gathering relevant information, identifying potential root causes, and providing clear, step-by-step resolutions.
- Use active listening and effective communication to understand customer needs and resolve technical problems efficiently.
- Support password resets, user permissions, account access, and related technical requests using established support procedures.
- Perform remote troubleshooting and guide users through technical solutions while maintaining a professional and customer-focused experience.
- Manage multiple support requests while prioritizing issues based on urgency, customer impact, and business needs.
- Document incidents, troubleshooting steps, and resolutions accurately in ticketing systems to support efficient issue tracking and follow-up.
- Escalate complex or unresolved issues appropriately while maintaining ownership of the customer interaction.

IT Support / Customer Experience Associate

November 2023 – April 2024

Intuit

Contract via Arise Virtual Solutions | Remote

- Delivered remote technical and customer support for software, connectivity, account-access, and configuration issues.
- Diagnosed technical problems using structured troubleshooting techniques and guided customers through clear resolution steps.
- Provided professional communication and active listening while working directly with customers to identify needs and resolve problems.
- Managed customer interactions in a fast-paced environment while maintaining accurate documentation and service quality.
- Tracked and documented incidents through ticketing systems, maintaining accurate records of customer issues and resolutions.
- Escalated complex or unresolved issues appropriately while maintaining ownership of the customer experience.

PROJECTS

SOC Level 1 Alert Triage — Security Operations Lab

- Investigated simulated authentication alerts to identify potential brute-force activity.
- Analyzed supporting logs, prioritized alerts by severity, classified activity, and documented investigation findings.
- Demonstrated alert triage, log analysis, threat detection, SIEM investigation, and incident documentation.

Linux Log Analysis Pipeline — Linux / Bash

- Created an automated Bash-based workflow to collect Linux system information, analyze logs, and generate structured reports.
- Used Kali Linux, Bash, Python, SQL, and Linux command-line tools to develop a repeatable security-data analysis process.

Network Security Lab — Networking

- Built a hands-on laboratory environment focused on network traffic analysis and security fundamentals.
- Performed packet analysis and network troubleshooting using TCP/IP and Wireshark while identifying potentially suspicious network activity.

Secure Password Generator — Python

- Developed a Python-based password generator that creates randomized passwords to demonstrate practical automation and cybersecurity concepts.
